ACKNOWLEDGMENTS

THE T SQUARE CLUB HERE RECORDS ITS SENSE OF INDEBTEDNESS TO THOSE ARCHITECTS AND ARTISTS WHO, BY GENEROUS CONTRIBUTIONS OF THEIR WORKS YEAR AFTER YEAR, MAKE POSSIBLE THESE EXHIBITIONS, AND THEREBY LEND THEIR AID TO A POTENT FACTOR IN THE HEALTHY GROWTH OF ARCHITECTURE AS A FINE ART, TO PAUL PHILLIPPE CRET AND C. F. OSBORNE FOR THE REVIEW AND NOTES OF THE YEAR HERE PRESENTED, AND TO THE ART CLUB FOR THEIR COURTESY IN EXTENDING THE USE OF THEIR GALLERY FOR THE PURPOSES OF THE EXHIBITION.

TO THE ADVERTISERS, THE OFFICERS AND MEMBERS OF THE T SQUARE CLUB DESIRE TO EXPRESS THEIR APPRECIATION OF THE LIBERAL SUPPORT WHICH HAS GONE FAR TOWARD MAKING THE PUBLICATION OF THE CATALOGUE POSSIBLE.

ANNOUNCEMENT

A NUMBER OF THESE BOOKS ARE RETAINED FOR SALE, AND WILL BE FORWARDED, POST PAID, UPON RECEIPT OF SEVENTY-FIVE CENTS. CATALOGUES OF PREVIOUS YEARS CAN BE OBTAINED BY ADDRESSING THE SECRETARY OF THE CLUB.

THE UTILITY OF EXHIBITIONS

BY

PAUL CRET

THOUGH we have a wise saw which admonishes us to turn our tongue seven times in our mouth before speaking, the wisdom of the past has neglected to advise us how many times we should lay our pen aside before committing our thoughts to paper. The spoken word evaporates, but the written word endures—as says the Latin proverb—and caution is especially enjoined when our impromptu ideas and judgments are to be printed forthwith, and displayed in cold type before the critical eyes of others.

These reflections press upon me as I hasten to respond to the courteous request of the Exhibition Committee of the T Square Club for a critical essay on the exhibition of 1905. I cannot, it is true, meet the letter of their request owing to the delayed arrival of some of the most important contributions to the exhibition, but I hope that an expression of the more general principles which affect all such exhibitions of architectural subjects may, in some measure, fulfil the spirit of the invitation. I desire especially to speak of the educational value of such exhibitions.

The Paris journals have an unfailing source of jest in the alleged deserted air of the rooms assigned to the architectural displays in the annual Salon. They declare that no one is found in them save those who have been choked with the dust raised by the crowds which throng the galleries of paintings, and that even these only linger to rest themselves for a few moments upon the empty benches, or it may be to meet a friend. The critics of course exaggerate, but even if what they say were true, I for one, should not complain. For to me it is not the public which is to be appealed to and benefited, but the architects themselves. And I say this with conviction, for aside from extensive travel and skilled observation of the

important buildings in process of construction or just completed, nothing can replace an exhibition of architectural drawings as a source of inspiration for the earnest designer.

Let me make my meaning clear.

If one attempt to derive just impressions of the true spirit of contemporary architecture from the many books which have been published in the modern era one finds endlessly divergent views. Why, on this subject above all others, and one so essentially of our own day, appreciation should be so regardless of sound canons of criticism I am increasingly unable to understand. Whence come these divergencies of the many schools of criticism; these reciprocal excommunications; or finally these palpable mistakes? It needs all of one's critical faculty and capacity for reconciliation to discern amid the contradictions of the texts, the small residuum of truth which they contain—even when stripped of the verbiage and amplification in which the theory has been enwrapped for the very evident purpose of rendering it the more startling. Architecture is unquestionably a science, if by *science* we mean a study of natural laws and their effects. Yet most writers of our day fail less perhaps through sheer ignorance than because they follow the now prevailing fashion of attempting to explain scientific problems by quasi-philosophical theories. They especially err in thinking that the æsthetic side of their theme may be divorced from its other aspects, not perceiving that they are all fundamentally related. Especially are they given to discourse of the outline of the sculptured leaf, the degree of curvature of an arch, or the number of modules in the column, as if such trifling details contained the essence of the art.

Few treatises then on the art and craft of architecture will be of much avail; and it is for this reason that I always hear with pleasure of the opening in any city of an exhibition of architectural drawings, since these will be more effective in my opinion for the advancement of our art than many pages of dissertation however learned. Yet there are certain dull minds to whom such exhibitions as the present offer no other aspect than that of contributing to the vanity of the exhibitors by a meanly satisfied desire of applause; or even that of a favorable occasion to the competitors to speak deprecatingly of their *confreres* under the guise of doing them artistic justice.

It is my own opinion—though subject to correction—that it is not the public who is really most benefited by these exhibitions. Such of the general public who attend will be ill prepared to understand what they see. Laymen

should only judge architecture from the executed work. The labor of comparing the three projections of a design in order to reach a just conclusion of its merits is beyond their power; and as for those who profess to judge from the façade alone, or, more especially, from a more or less well rendered drawing of the façade—for myself, I confess I should prefer their indifference. Architectural exhibitions are of value then most of all to architects, and especially to those who are prepared to profit by them. To these they afford both aid and encouragement.

A study of the formative period of American architecture, especially during the latter half of the nineteenth century, shows a long series of attempts—often fruitless it is true—toward the crystallization of a national style; each attempt gathering strength as the series progresses, from the experience of its predecessors. Each building thus becomes a link in a chain which is composed of those which precede and those which follow it. So the fundamental spirit of the style finds continually fuller expression until its exaggerations bring about decadence.

Always and everywhere one sees the universal operation of that natural impulse by which we reinforce the inadequacy of our equipment for the work of life by assimilating the experience acquired by others.

I insist a little on this point, because its importance has been denied by those who are fond of clamoring for originality at whatever sacrifice. There never has been a single epoch of architecture which has been isolated from its neighbors, nor a single artist of distinction who thought himself independent of his contemporaries. But it is not possible for the local architect to visit all of the important buildings which lie scattered over the land; and here is the true function of the exhibition, to bring to him arranged in one collection, all the buildings of the past year presented as their designers would have them presented to their colleagues.

And so with regard to our own exhibition, it may happen that a few discerning spirits will discover the spirit of the age in our collection, and when the time comes will themselves be the more certain to achieve distinction. Masterpieces are produced only in this way.

There is finally another aspect of these exhibitions which we may well consider for a moment. From a study and comparison of the drawings it comes sooner or later that certain names achieve a reputation. This reputation it is true sometimes does not pass beyond the architectural world; but if it is less remunerative it is unquestionably more flattering to be admired by one's peers than by the not always justly discriminating public.

This conviction serves to explain the enthusiasm which sustains such exhibitions.

The T Square Club then in promoting this exhibition, makes a most valuable contribution to the powerful forces now at work in this country for the formation of a national style which shall be both characteristic and completely developed. The consciousness of this will doubtless be in itself a sufficient recompense for those members who each year give so freely of their time and labors to make the exhibition a success. We also fully appreciate at their true worth the disinterested efforts of the contributing architects who have prepared these careful drawings with the sole end in view of submitting their compositions to the judgment of their colleagues and the public, and to them also the Club extends its heartiest thanks.

So much said, I imagine it will be well to let the drawings speak for themselves; with the assurance which I can well make that the exhibition of 1905 falls in no respect below that of its distinguished predecessors.

SKETCH IN PADUA
MIDGLEY W. HILL

Envois, Fellowship of the University of Pennsylvania

NOTES OF THE YEAR

THE EXHIBITION

Our labors are over and the exhibition may speak for itself. Professor Cret has elsewhere voiced our appreciation of the efforts of those who, whether as contributors or managers, have so generously striven to make it a success. That they have not labored in vain a visit to the galleries of the Art Club will attest. Matters are stirring themselves into shape even at this early date for an expansion of the scope of the exhibition another year, and it is confidently expected that the exhibition of 1906 will include in more spacious quarters not only architectural drawings and models, but a collateral exhibition of the allied arts and crafts. We feel assured that if this can be brought about it will not only increase the interest of the general public, but add an important educational element for the consideration of our colleagues as well.

THE ATELIER

The first competition of the reorganized T Square Club Atelier has been recently concluded, and the award of fifteen first mentions and a medal by the Society of Beaux Arts Architects is sufficient evidence of the excellence of the work now being done. After a preliminary year of encouraging work with Mr. Paul A. Davis, 3rd, as *patron*, the Atelier passed on September 1st into the charge of Professor Paul Philippe Cret of the University who comes to us laden with honors from the Ecole des Beaux Arts, and with a keen appreciation of the American problem. Under the scheme of reorganization, the Atelier is made an organic part of the educational activities of the Academy of the Fine Arts, and its members enjoy all the rights and privileges of students of the Academy. They are eligible to compete for the Cresson Fellowship of the Academy, the Scholarship of the Beaux Arts Society, the Stewardson Scholarship, the Walter Cope Memorial Prize of the Club, and (under special qualifications) for the Alumni Fellowship of the University. Twenty students, who are engaged during the day in various Philadelphia offices, are now heartily at work, inspired with the fullest measure of that *camaraderie* which is so essential to the success of atelier work. The time is fully ripe for new and enlarged quarters, and the need is especially felt for a good working library of the kind best suited to atelier requirements. The library of the School of Architecture at the University has been placed freely at the service of the Club, but its distance from the club house makes it nearly impracticable to

consult it. It is sincerely hoped that some means may soon be found of responding to the enthusiastic and devoted work of our students in the way suggested.

THE YEAR
IN THE CLUB

The club has had a prosperous and successful year, both financially and socially. Desiring to add even further interest to the monthly meetings, the new administration has somewhat changed the character of the programmes. Refreshments, which heretofore have concluded, now agreeably open the evening's entertainment in the form of a dinner to which all members are freely welcomed. After a suitable interval the more intellectual entertainment begins, taking usually the form of a discussion of some pre-arranged topic. "Palladio," led by Professor Osborne, "Civic Betterment," led by Mr. Albert Kelsey, the well known authority on that subject, and "Sewage Disposal Systems," by Mr. F. W. Farquhar, have already vindicated the wisdom of the innovation. The Walter Cope Memorial Prize is a most welcome addition to our resources. It affords an additional incitement to the younger members, and perpetuates the tender memories of one who with his manifold gifts was always a true friend and wise counsellor to the club. As an evidence of its regard for his memory, the club has appropriated a substantial sum for the erection of a memorial tablet to Mr. Cope in the central hall of his last professional creation—Washington University at St. Louis. The subject of the Cope prize for this year is the pertinent one of "A Recreation Park and Pier on the Delaware River Front." The site selected will form the eastern terminus of the Southern Boulevard system. The competition closes on January 3d, and the award will be announced at the stated meeting of January 4th. Among the aspirations of the club is the growing desire for a permanent home. Much time and thought has been expended in this direction by a special committee, but financial obstacles still block the way.

THE YEAR
IN THE OFFICE

The year 1904 has been one of unusual quiet in local offices. Periods of depression and recovery on the business side of architecture lag somewhat behind those of other activities, and the falling tide in the business world of last year has not yet reached its ebb with us. It is confidently expected however that the unmistakable signs of a general recovery throughout the country will soon make themselves felt in the architect's office. The most notable buildings of the year from an artistic standpoint have been those connected with University life, especially the Gymnasium and the Stadium of Franklin

field. University traditions necessitate a somewhat archaeological treatment of her buildings, however modern their use, but this latest operation is a distinguished addition to the already notable group which includes the Law School, the Dormitories, the Medical and Engineering Laboratories, and the Museum of Science and Art. In the business centres there have been no extensive operations if we except the new Wanamaker stores just begun, but it is of interest to note an increasing use of reinforced concrete in the field to which it has shown itself especially applicable. The official approval of the Fire Underwriters' Association and the Bureau of Building Inspection will doubtless encourage a further extension of its field of usefulness.

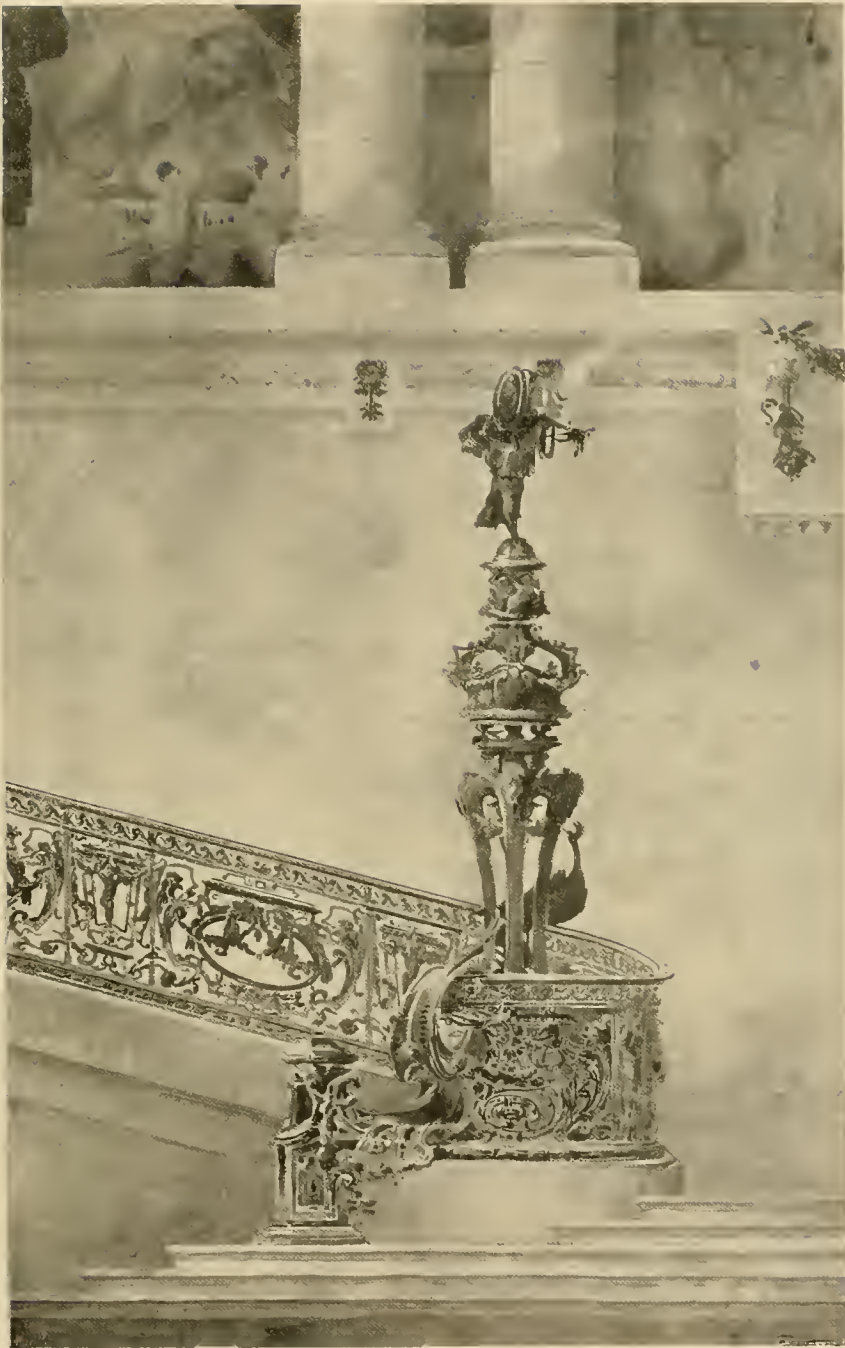

Deeply rooted local conservatism continues to offer a passive resistance to the influence of the modern school of design in the domestic field, and the past year has seen several characteristic additions to the number of suburban and rural residences which show all of the old time colonial spirit for which Philadelphia has been heretofore distinguished in the national field. There are evidences however that succeeding generations will be less and less influenced by this local note, and in the not far distant future Philadelphia will in all probability become cosmopolitan.

MUNICIPAL IMPROVEMENT The civic conscience of Philadelphia seems to be slowly awakening to the responsibility of the present generation as a trustee for posterity. The Torresdale Boulevard now under construction; the City Hall to Fairmount Park Boulevard authorized and soon to be begun; the Southern Boulevard project nearing fruition, and the acquisition of several sites for small parks are all evidences of this. The most important project now under preliminary consideration is a scheme for the parking of the banks of the Schuylkill from Fairmount Dam to the Delaware, including Bartram's Park. A careful study of the complex problems presented is now being made by very competent experts, and the project will include a general campus scheme for the University where it becomes tangent to the riparian park as the design of the latter is expected to develop. There are few cities in America or Europe which present such an opportunity as is now afforded by the Schuylkill as it penetrates the centre of the city within a mile of the business focus at Broad and Chestnut streets. There can be no question that future generations will demand this action, but every passing year makes its realization more difficult and costly. It is by no means too late, in spite of the apparently insuperable obstacles now presented, but in a few years the cost may be prohibitive, and posterity may have to solace itself with an exasperated and contemptu-

ous condemnation of the bourgeois attitude of early twentieth century Philadelphians toward their splendid opportunity. Among other similar problems which will be presented for solution by the betterments of the city, the elevation of the Reading tracks from Spring Garden street northward will ere long afford an opportunity for architectural co-operation which it is to be sincerely hoped may not be neglected. If some affluent Philadelphian, following the notable example of Harrisburg, were to make possible a tour of observation by a commission of responsible civic authorities, there can be little doubt that executive support of the Civic Betterment Association would be more freely given; especially if the survey of the commission could be extended to European municipalities. London, Paris, Berlin, Vienna, and even more remote Buda-Pest, are far in advance of us in their treatment of municipal problems; and at home many smaller cities have won just fame for the successful care and attention to a matter which is so intimately connected with the public health. "Wake up, Philadelphia!" is a much needed civic rallying cry.

"Standard"

PORCELAIN ENAMELED WARE

Was awarded the "Grand Prize" at the Louisiana Purchase Exposition, St. Louis. The highest honors have been conferred upon "Standard" Ware exhibited in competition with all other sanitary ware of foreign and domestic manufacture at nine consecutive national and international expositions.

THE NEW MIDLAND RAILWAY HOTEL AT MANCHESTER, ENGLAND
Equipped with "Standard" Ware

"Standard" Ware is the preferred equipment of all discriminating property owners the world over. Its installation insures not only sanitary and artistic excellence, but means an addition to the selling value of the property.

Every piece of "Standard" Ware bears our "Green and Gold" guarantee label and has our trade mark "Standard" cast on the exterior. Include "Standard" Ware in your specifications and refuse substitutes.

Standard Sanitary Mfg. Co.

PITTSBURGH, U. S. A.

"Standard"

PORCELAIN ENAMELED LAVATORIES

are typical of all that is best in this class of sanitary equipment. They are the outcome of thirty years' manufacturing experience and true to our trade mark, are superior to all others in design, quality and durability.

The "Anona" lavatory is but one of our many elegant and unequaled one-piece lavatories.

ANONA—PLATE P 520

Our line is extensive and varied, to meet the demands of all classes of building construction and to satisfy all limitations of cost, but no matter how they differ to meet these conditions, each and every fixture meets the exacting requirements of modern sanitation better than any others made.

Our entire output of "Standard" Porcelain Enameled Ware is exhibited in our new 500-page general catalogue "P." This catalogue is conceded to be the most refined and complete ever published, and applications are invited from architects not already supplied with a copy.

At the St. Louis Exposition, the many forestry exhibits were among the most interesting things on the grounds. Conspicuous among the foreign exhibits were those of the Phillipines, Canada, Argentine Republic and France. All of these and many others were finished with BERRY BROTHERS LUXEBERRY WOOD FINISH and the enthusiastic reports that came to us make us very proud of these goods. There were also many state forestry exhibits and state buildings finished with this varnish. Also the great yellow pine exhibit, and the Hoo Hoo Building. At least 90 per cent. of all the varnish used on the St. Louis Exposition grounds were made by Berry Brothers. Besides Luxeberry we make for architects

The "U" Bar System of Construction

for conservatories and greenhouses is the most important advance ever made in the building of Horticultural Structures. The following are some of the improvements over the old methods.

Strength and Gracefulness

The shape of the "U" Bar section is such that the maximum strength is obtained at all points with a minimum amount of material. Being adaptable to any curve allows opportunity for graceful design and construction.

Lightness and Durability

Heavy structural members such as wide iron rafters, etc., are done away with. The strength and stiffness of the "U" Bars admits of as wide spacing as the strength of glass will permit, and their small sectional area offers a minimum amount of obstruction to the passing of the sun's rays.

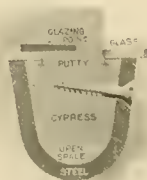

The major portion of all structural members exposed on the inside of the house being iron and those on the outside being wood, insures great durability and perfect freedom from all trouble arising from expansion and contraction.

All iron structural members are heavily galvanized.

Simplicity and Adaptability

The simplicity of construction permits of many combinations in design, making it peculiarly adaptable for horticultural building purposes.

WE ALSO MANUFACTURE ALL OTHER TYPES OF GREENHOUSES

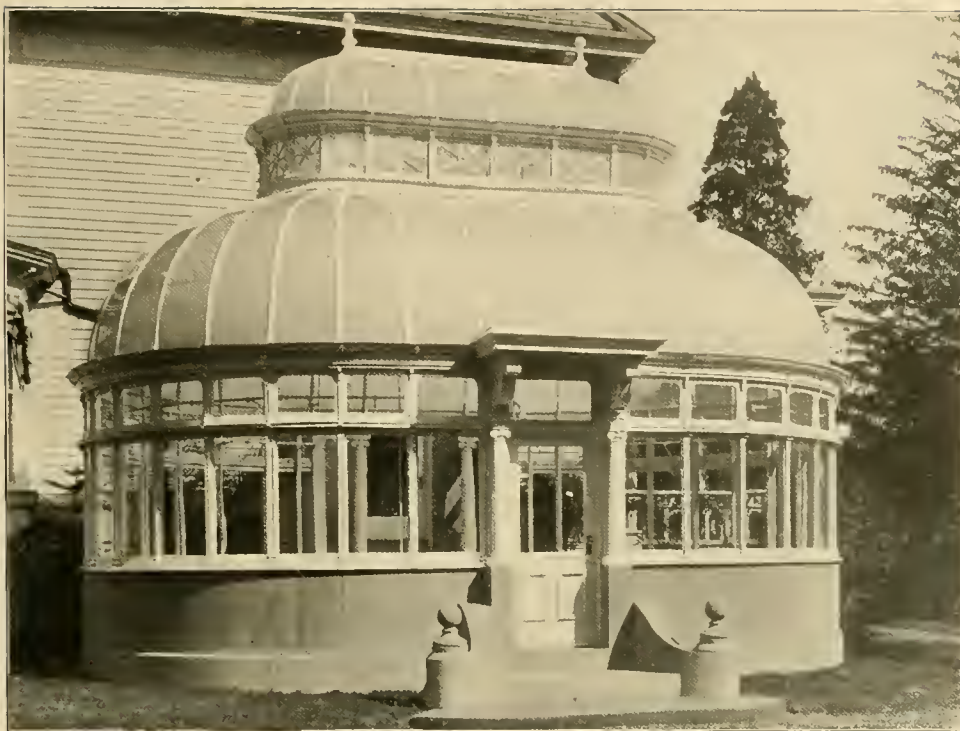

Reduced Section of "U" Bar

We will be pleased to submit finished drawings of conservatories or greenhouses, or to develop architects' rough sketches, and furnish estimates for erection complete.

Reduced Section of "U" Bar

“Novelty”

THE BEST RANGE FOR THE BEST PEOPLE

FRENCH NOVELTY DOUBLE-OVEN RANGE

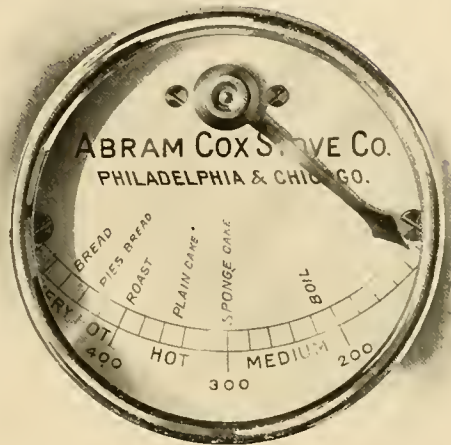

PERFECT	{	COOKING	REMOVABLE OVENS	ECONOMICAL IN THE
		BAKING	WARMING CLOSET	USE OF FUEL
		BROILING	THERMOMETER ON OVEN DOOR	DURABLE
		ROASTING	HEAVY DUPLEX GRATE	EASILY MANAGED
		FRENCH TOP	BEAUTIFUL DESIGN	NEW IDEAS

ABRAM COX STOVE CO., PHILADELPHIA, PA.

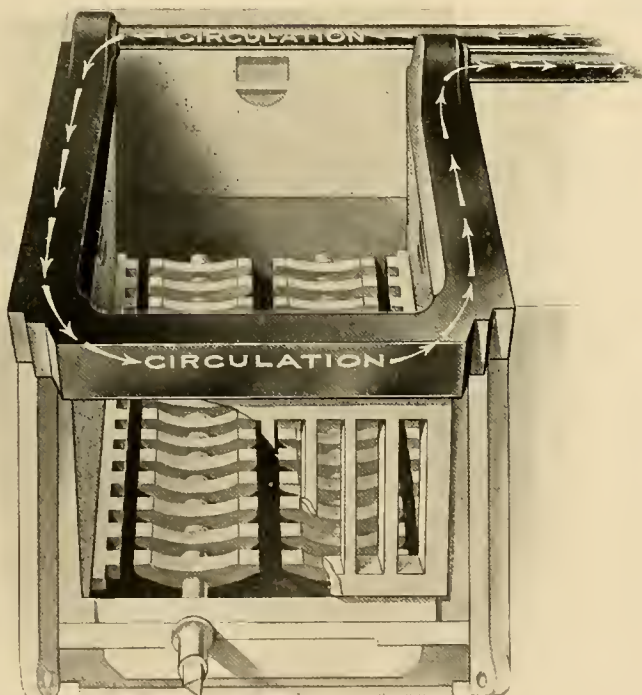

"Novelty"

NEW STYLE WARMING CLOSET—IT OPENS LIKE A
ROLL TOP DESK, MADE OF SHEET METAL.

WITH THE THERMOMETER ON THE OVEN DOOR YOU CAN
TELL JUST HOW HOT THE OVEN IS. WITHOUT THE THER-
MOMETER YOU GUESS HOW HOT IT IS; MANY A GOOD
BAKING HAS BEEN SPOILED BY GUESSING.

HOT WATER, YES LOTS OF IT; ALL YOU WANT; WILL HEAT 80 TO 100 GALLONS
OF WATER; NOTICE THE PECULIAR SHAPE OF THE WATER HEATER—IT'S A WONDER.
THIS IS AN IMPORTANT FEATURE IN THE FRENCH NOVELTY RANGE; LOOK AT THE
CONSTRUCTION OF THE FIRE BOX AND THE GRATE. DID YOU EVER SEE A MORE
SENSIBLE AND DURABLE CONSTRUCTION? WHEN YOU SPECIFY A RANGE SPECIFY
THE FRENCH NOVELTY.

THE PROPER PAINT SPECIFICATION FOR IRON WORK

At the Mill.—Before painting, all surfaces must be thoroughly cleaned: freed from loose scale, dirt and moisture. The entire surface shall then be given a well-applied coating of Dixon's Silica-Graphite Paint. Parts to be in contact and enclosed shall receive before assembling a coat of the same material.

After Erection.—Places damaged by abrasion shall first be re-touched. The entire work shall then be given a second coat of Dixon's Silica-Graphite Paint, of a different color than the mill coat.

The paint to be furnished to the mill and building site, in original packages, READY MIXED for use, as manufactured by the

JOSEPH DIXON CRUCIBLE COMPANY,

1020 Arch Street, Philadelphia.

Dixon's Silica-Graphite Paint is the original graphite paint;

Forty years of tests.

REPUTATION !

When an engineer recommends a certain heating system, his reputation depends on its efficiency. That is why so many of the foremost engineers install the

WEBSTER SYSTEM OF STEAM CIRCULATION

for they know by experience what it will do—and their reputation is not a thing to risk lightly.

Perfect circulation at or even below atmospheric pressure.

Send for Booklet H 23.

Winter's Dread

is the bed-time thought of rising, dressing, bathing and breakfasting in cold rooms. There's a way out.

AMERICAN & IDEAL RADIATORS & BOILERS

keep the house uniformly warm in the morning—all day—any kind of weather—without attention to the fire during the night. When you recall the fuel needlessly burned or the discomforts caused last winter by old fashioned methods, why wait longer to ask about

our way of steam or water warming your home? The fuel saving—cleanliness—absence of repairs—pay in time for the outfit. *Family health is protected.*

Simple to put into old cottages, houses, buildings, etc.

Easy to run as a parlor stove. No street water supply required. Put in now at *summer* prices by best mechanics. Ask for booklet.

"MONARCH" SASH CHAINS

The best Sash Chain made. Gives the highest tensile strength. Our chains are **blanked with the grain of the metal**, insuring full strength of the material and perfect uniformity. Made from a special pure bronze, which is thoroughly **non-corrosive**. Note **shape of the links**. They are flattened, making them stronger than the ordinary chain, also **prevent substitution**. The short semi-circular crown and shape of link forms a truss which makes the "Monarch" chain flexible up to the breaking point. Actual tests show **greatest tensile strength**. M'f'd by

Wood Painting
AND
Metal Painting

Are entirely different problems. Paints which perfectly protect wood are useless on structural steel. There the paint must not only exclude moisture, but must to the greatest extent contract and expand without cracking or letting go, and must last indefinitely, because inaccessible for repainting.

ASSYRIAN METAL
PROTECTIVE PAINT

Fully meets all these conditions. It is a logical paint made in a logical way from logical materials, and has never failed. Detailed information on request.

It is with much pleasure that we are able to announce that we have secured, as Consulting Decorator, the services of Margaret Greenleaf of New York City, the noted writer upon house embellishment. Miss Greenleaf will be a regular member of our staff and will furnish without charge to our patrons, complete color schemes and suggestions for a single room or an entire house, including walls, draperies, furniture, tiles and fixtures. Her work in the past has been largely with architects, and she is most successful in assisting in the decorative color scheme, the idea expressed in the architecture of the room.

A ROOFING TIN THAT IS REALLY GOOD

The *exceptional* roofing tin. Different than any other. Not only *said* to be good, but *guaranteed* to be good.

McClure's Genuine Charcoal Iron Redipped

BRAND ROOFING TIN

is the *only* roofing tin made to-day that *is* guaranteed to wear for any length of time. It is

GUARANTEED TO WEAR 15 YEARS

If the tin should wear out within that time we will *replace* it at *our* expense.

Without delving into the charcoal iron vs. steel controversy, don't you think that these facts *alone* show the superiority of McClure's Genuine Charcoal Iron Re-dipped Brand Roofing Tin over all others?

Lucas Paint

(Tinted Gloss)

Should be specified for high class work because it can be depended upon for results.

Our sixty years of practice has enabled us to know what is necessary in a good article and just what proportions are best.

This knowledge is used to advantage in the production of paint which to-day has no superior and few if any equals.

Durable to an extreme, wide spreading power and ability to withstand weather and maintain color, are its virtues, and these are attested to by thousands of owners, architects and builders.

Allow us to supply your next need, or at least the pleasure of talking it over with you.

LAND TITLE BUILDING

PHILADELPHIA

If you want the best roof known, have your roofer use "TAYLOR OLD STYLE" Roofing Tin, the old original brand, and see that you get it. Substitutes for this celebrated Tin are sometimes offered under similar names. The genuine bears the trade mark of the "Target and Arrow" and our name as makers stamped on every sheet. No other tin is made in the same way nor of the same materials, and no other roofing approaches the standard for durability that "TAYLOR OLD STYLE" Tin has established during a half century of actual service on American roofs.

5000 K. W. Engine Driven Unit at our New Station.

Isolated Plants Must Go !

The day of the isolated plant has passed. Every engineer or architect who induces his client to install his own plant without first making a careful investigation into the costs and economies of Central Station Supply, is doing both his client and himself an injury.

If you make a sincere and thorough inquiry regarding methods and rates we don't believe you will think of installing an isolated plant—it is an obsolete method, a constant source of anxiety and expense.

With our huge modern stations we can generate power more economically than you can, and we will sell it for less than you can generate it.

That is an offer that demands your attention. We will be pleased also to make free engineering and electrical tests and render estimates. We solicit your inquiries.

NOTICE

We desire to call your attention to the
change in the name of our celebrated
FLOORALAC to FLOOR SPAR.

If you want the most perfect floor finish
use FLOOR SPAR.

FLOOR SPAR is made with great care
and will not scratch or turn white like
shellac.

FLOOR SPAR is free from the slip-
periness caused by the use of wax.

FLOOR SPAR works freely and dries
quickly with a high gloss which hardens
with age.

FLOOR SPAR stands even the hardest
wear, as its use by many of the leading
colleges, hospitals and other public insti-
tutions attest.

Give FLOOR SPAR a trial and be
convinced.

MANUFACTURERS OF

DECORATIVE MARBLES

IMPORTED and Domestic Marble reproduced in any color; Onyx, Sienna, Red Numedean, Pink Numedean, Conomara Green, Alps Green, Black and Gold, Irish Green, Pavernazza, Verd Antique. Our artificial marbles should not be confused with any cheap imitation, as they are thoroughly substantial and true to the original marble in coloring and every detail of graining, and will, in many cases, out-last the natural product. Below will be found a few of the Churches, Hotels, Stores and other important buildings in which we have placed our marble, and where it is giving unqualified satisfaction.

ST. JOACHIMS R. C. CHURCH, Philadelphia; HOTEL CHALFONTE, Atlantic City; BAILEY, BANKS & BIDDLE, Philadelphia; PEABODY LIBRARY, Athens, Ga.; FULTON OPERA HOUSE, Lancaster, Pa.;
BANK OF PITTSBURG, Pittsburg; WEST CHESTER LIBRARY, West Chester, Pa.;
LULU TEMPLE, Philadelphia; Y. M. C. A. BUILDING, Buffalo; ST.
BONAVENTURA'S R. C. CHURCH, Philadelphia.
